Question: The Identify tool returns nothing, what should I do?

Answer:

Check that you have zoomed in to 1:100,000 scale. Current scale shown on the bottom of the screen. You can scroll the mouse wheel to zoom in and out.

Check that you have the layer turned on, ie the features (points, lines, polygons) are showing on the map.

If the scale is right and you can see the features try to do a search on an area, ie: select one of the polygon tools then draw an area that covers the features, or

Try un-tick the map group to turn off the layer then tick the group again to turn it back on.

Question: The Zoom in tool only drags the map around, what should I do?

Answer:

Double click the centre where you want to zoom to, or

Click the Zoom out tool then click the Zoom in tool to “wakeup” the Zoom in tool
